

THERMOSASH

RL System: RL FiberthermX
Project Size: 4,300m²
Location: Levin
Project Date: 2021

Architect: Create Architects and Engineers
Installer: Tararua Roofing

PROJECT DESCRIPTION

The new Thermosash factory in Levin is a 4330m² purpose-designed manufacturing and office facility featuring precast panels as well as Thermosash's own glazed façade system on the two most prominent, public-facing elevations.

The main structure consists of steel portal frames designed to suit the production lines and areas of the factory with overhead gantry cranes. The building also houses 448m² of amenities, such as offices, meeting rooms and a large staff cafeteria.
